	Amount to enter if only one site.	Amount to enter if more than one site.

INSTRUCTIONS

Beginning January 1, 2002, an ethanol blended gasoline tax credit is available to retail dealers of gasoline who operate metered pumps at a service station. To qualify for the credit, the dealer must operate at least one service station at which more than 60 percent of the total gallons of gasoline sold and dispensed through one or more metered pumps during the tax year is ethanol blended gasoline.

This credit must be calculated separately for each service station site operated by the taxpayer. The amount of credit for each eligible service station is two and one-half cents multiplied by the total number of gallons of ethanol blended gasoline sold through all metered pumps at that station during the tax year in excess of 60 percent of all gasoline sold through metered pumps at that station during the tax year. The credit can only be taken for those service station sites where more than 60 percent of the gasoline sold was ethanol blended gasoline. **This form should be completed for each service station site, and the total amount of credits for all eligible service station sites can be claimed on the individual or corporation income tax return.**

Any credit in excess of the tax liability can be refunded. In lieu of the refund, taxpayer may elect to have the overpayment credited to the tax liability for the following year. In addition, if the taxpayer is a partnership, limited liability company, S corporation, estate or trust, the credit must be allocated to the individual owners in the ratio of each owner's share of the earnings of the entity to the entity's total earnings.
